TECHNICAL SKILLS

Web Development	HTML5, CSS3, JavaScript, TypeScript, React.js, Tailwind CSS, Material UI, Node.js, Express.js, Next.js, MongoDB, MySQL
DevOps & Tools	Git, Docker, Vercel, Render, AWS
Programming Languages	C++, JavaScript, TypeScript

WORK EXPERIENCE

Radical Global　　　　　　　　　　　　　　　　　　　　　　　**Oct 2024 - Present**

Full-Stack Development Intern
- Focusing on building and enhancing Shopify applications using React, Node.js, and MySQL.
- I have successfully developed **3+** Shopify apps, leveraging React for dynamic front-end interfaces, Node.js for scalable back-end solutions, and MySQL for efficient data management.
- Utilize **Liquid templates** to customize Shopify themes and employ the **Polaris UI** library to create consistent, user-friendly interfaces.

Webakruti　　　　　　　　　　　　　　　　　　　　　　　**Feb 2022 - Apr 2022**

Web Development Intern
- During my internship, I developed **30+** React.js components to their website.
- Developed **RESTful** authentication APIs and integrated them with frontend components to enable seamless client-server data interaction.
- Optimized application performance, improving page load times by **20%** through code refactoring and database optimization**.**

PROJECTS

CompileHub : (AI-Enhanced Multi-Language Online Compiler)　　　🔗**Live Link**　◯**Source Code**
- Developed CompileHub, an online compiler supporting **5** programming languages: **C++, Python, Java, JavaScript & C**.
- Integrated an **Optimization Tips with AI** feature that analyzes code and provides optimization suggestions along with improved code.
- Implementing **Google OAuth** authentication via Passport.js and email-based login with **JWT** tokens.
- Successfully deployed the frontend on Vercel and the backend on Render, and containerized the backend using **Docker** for a consistent development environment.
- Developed a fully responsive MERN stack application with Material UI, ensuring seamless user experience across all devices.
  Tech Stack - React.js, Tailwind CSS, Material UI, Node.js, Express.js, MongoDB, Docker.

QueryMinds : (AI-powered Chatbot with Gemini API)　　　🔗**Live Link**　◯**Source Code**
- Built a **MERN stack chatbot** web app that efficiently resolve client queries.
- Leveraged **Google's Gemini API** to receive and resolve user queries dynamically.
- Implemented secure **JWT-based** authentication with encrypted password storage in MongoDB via Bcrypt.
- Integrated **Razorpay** to monetize usage, directing users to a payment page after 20 queries.
- Built a fully responsive and scalable website, deployed seamlessly on Vercel, ensuring high performance performance and availability.
  Tech Stack - React.js, Tailwind CSS, Node.js, Express.js, MongoDB, Razorpay.

GitShield : (.gitignore generator)　　　🔗**Live Link**　◯**Source Code**
- Develop a full-stack web app that generates **.gitignore files** for the developer community.
- Leverage the **Toptal API** to support over **550+** file types.
- Implement robust search and suggestion features to help developers find the right file types quickly.
- Ensure the website is fully responsive and scalable. Deploy the app on **Vercel** for optimal performance.
- Provide continuous updates to support new and emerging file types.
  Tech Stack - React.js, Tailwind CSS, Node.js, Express.js

ACHIEVEMENTS
- Solved **250+** DSA problems across LeetCode and GeeksforGeeks platforms
- Secured **7th** place in the CodeQuest Hackathon Coding Challenge.

EDUCATION

Priyadarshini College of Engineering, Nagpur　　　　　　　　　　**2020 - 2024**

B.Tech in Computer Science & Engineering　　　　　　　　　　　　　　8.4 CGPA
